## HOW TO MEASURE YOUR RING SIZE

### Step 1:

Print this page ensuring your printer is set to print the page at 100% scale and that you are printing on standard US letter paper or A4 paper.

### Step 2:

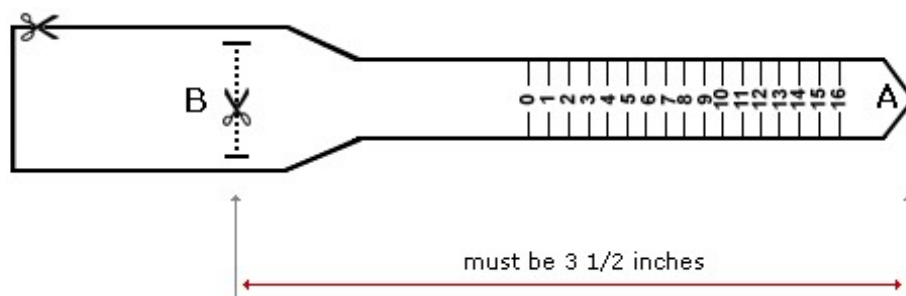

Check your print out is accurate by comparing the measurements here with a ruler.

### Size Your Finger

Cut around the ring sizer. Cut a slit indicated "B" on the left of the ring sizer. Insert the sharp point marked "A" through the slot "B". Then, place the ring sizer over your finger and pull the tab until it fits comfortably. Read the US size from the scale.

To get an accurate reading - size your finger at the end of the day with warm hands. This is because cold fingers are slimmer and may give an incorrect reading. Ensure the paper can slide up and down your finger reasonably easily, the width of the signet ring will grip your finger more than the paper.

### Size A Ring

Use a ring that fits the finger you wish to size.

Place the ring on the circles until you find one where the black circle touches the inside of your ring all the way round.
